Analysis of Ownership Structure

XP Power Ltd. has a single class of shares (Stock A) with one vote per share, totaling 23,689,254 shares outstanding. The free float is high at approximately 94.88%, indicating a broad distribution of shares available for trading and relatively low insider ownership (company-owned shares are negligible at 0.0317%).

The major shareholders are predominantly institutional investors, with the largest being Aberforth Partners LLP holding 10.84% of shares, followed by Van Lanschot Kempen Investment Management NV at 9.5%, and Steel Partners Holdings L.P. at 7.57%. The top 10 shareholders collectively hold a significant portion of the shares, indicating a moderately concentrated institutional ownership base.

This ownership structure suggests that XP Power is under the scrutiny of several large institutional investors who likely influence governance and strategic decisions. The high free float supports liquidity in the stock, which is positive for market participants.

Conclusion

XP Power's ownership profile is characterized by a high free float and significant institutional ownership concentration among top shareholders. This structure supports good market liquidity and suggests active engagement by institutional investors, which can be beneficial for corporate governance and strategic oversight. There is minimal insider or company-owned shareholding, indicating that control is largely in the hands of external investors.

This ownership information complements the financial analysis by highlighting the shareholder base that may influence the company's strategic direction and risk appetite, especially given the financial challenges and leverage noted in the financial ratios.
