

Tasks Configuration

Earnings Quality Task

Description:

You are analysing the {company} as specified by the user.

Read the following files in the output/{ticker} folder which contain all necessary information:

- data/{ticker}/{ticker}_agent_ratios.md
- data/{ticker}/{ticker}_auditor_report.md
- data/{ticker}/{ticker}_notes.md
- data/{ticker}/{ticker}_ceo_report.md
- data/{ticker}/{ticker}_income_statement.md

DO NOT use any other information, only use the information in the files specified above.

DO NOT read any *.pdf files, only look through *.md files.

For this task, look for files with any ownership details, such as results, notes to financials, etc.

Goal:

To assess whether reported profits are sustainable, repeatable, and cash-convertible or inflated.

Keep this short and concise.

- **Never** make up any data or add any information into the report that is not in the files provided
- Do not make anything up or fabricate any data
- Do not create any additional files, or output files, if there is information you deem important to output, place this in the output file specified
- Do NOT browse the web or make external calls - use only the provided files

Expected Output:

- A table showing all the metrics which you have used to assess the company, in line with the stated goal, with sustainable, repeatable, cash-convertible or inflated verdict
- A paragraph summarising the analysis of each of the metrics in context of the company and the information provided
- You must always provide a conclusion to your analysis
- Any additional information or documents required if anything is missing
- You MUST sign off with your full name and role at the end
- Do not sign for other agents, only your own output

Output File: output/{ticker}/{ticker}_earning_quality.md

Primary Ratios

Description:

You are analyzing {company}, in your capacity as a financial modeling and valuation expert, as specified by the user.

Read the following files in the output/{ticker} folder which contain all necessary information:

- data/{ticker}/{ticker}_agent_ratios.md
- data/{ticker}/{ticker}_income_statement.md
- data/{ticker}/{ticker}_cashflow_statement.md
- data/{ticker}/{ticker}_balancesheet_statement.md

DO NOT use any other information, only use the information in the files specified above.

DO NOT read any *.pdf files, only look through *.md files.

Goal:

The goal is to produce an expert equity valuation and quality analysis on the information provided.

You are to analyze the {ticker}_agent_ratios.md file and give your expert view on whether or not these are material to the current valuation of the company.

For this analysis, the focus is on the valuation ratios as shown in the {ticker}_agent_ratios.md file. Use the ratios and numbers as given in the {ticker}_agent_ratios.md file, do not change these or make up your own numbers.

Keep your report short and concise.

- **Never** make up any data or add any information into the report that is not in the files provided
- Do not make anything up or fabricate any data
- Do not create any additional files, or output files, if there is information you deem important to output, place this in the output file specified
- Do NOT browse the web or make external calls - use only the provided files in the data/{ticker} folder

Expected Output:

- A formatted table containing the ratios you used in your analysis from the data/{ticker}_agent_ratios.md file
- A second formatted table with the financial information you used in your analysis, obtained from the provided information in the data/{ticker} folder for {company}
- A paragraph summarizing the analysis of each of the metrics in context of {company} and the information provided
- You must always provide a conclusion to your analysis
- Any additional information or documents required if anything is missing
- You MUST sign off with your full name and role at the end
- Do not sign for other agents, only your own output

Output File: output/{ticker}/{ticker}_valuation.md

Ownership Task

Description:

You are analysing the {company} as specified by the user.

Read the following file in the output/{ticker} folder which contains all necessary information:

- data/{ticker}/{ticker}_company_ownership.md

DO NOT use any other information, only use the information in the files specified above.

DO NOT read any *.pdf files, only look through *.md files.

For this task, look for files with any ownership details, such as results, notes to financials, etc.

Goal:

Using the information provided, provide an ownership diagnostic matrix with the following:

- Insider Ownership %
- Recent Insider transactions
- Ownership changes

Check if there has been any insider transactions on the open market. Any cluster buying (e.g. 3+ insiders within weeks). Any new director buys before appointment. Any option exercises and sells or any outright sells, any option grants.

Keep this short and concise.

- **Never** make up any data or add any information into the report that is not in the files provided
- Do not make anything up or fabricate any data
- Do not create any additional files, or output files, if there is information you deem important to output, place this in the output file specified
- Do NOT browse the web or make external calls - use only the provided files

Expected Output:

- A formatted table with the above requested metrics, analysis and any additional information you deem necessary
- A paragraph summarising the analysis of each of the metrics in context of the company and the information provided
- You must always provide a conclusion to your analysis
- Any additional information or documents required if anything is missing
- You MUST sign off with your full name and role at the end
- Do not sign for other agents, only your own output

Output File: output/{ticker}/{ticker}_ownership.md

Balance Sheet Durability Task

Description:

You are analysing the {company} as specified by the user.

Read the following files in the output/{ticker} folder which contain all necessary information:

- `data/{ticker}/{ticker}_agent_ratios.md`
- `data/{ticker}/{ticker}_auditor_report.md`
- `data/{ticker}/{ticker}_notes.md`
- `data/{ticker}/{ticker}_balancesheet_statement.md`

DO NOT use any other information, only use the information in the files specified above.

DO NOT read any *.pdf files, only look through *.md files.

For this task, look for files with any ownership details, such as results, notes to financials, etc.

Goal:

To determine whether the company has:

- Sufficient liquidity to operate and invest
- Sustainable leverage to manage downturns
- Low refinancing or default risk
- Transparent liabilities, including pensions and leases

Keep this short and concise.

- **Never** make up any data or add any information into the report that is not in the files provided
- Do not make anything up or fabricate any data
- Do not create any additional files, or output files, if there is information you deem important to output, place this in the output file specified
- Do NOT browse the web or make external calls - use only the provided files

Expected Output:

- A table showing all the metrics which you have used to assess the company, in line with the stated goal
- A table showing the metrics above and your assessment and verdict
- A paragraph summarising the analysis of each of the metrics in context of the company and the information provided
- You must always provide a conclusion to your analysis
- Any additional information or documents required if anything is missing
- You MUST sign off with your full name and role at the end
- Do not sign for other agents, only your own output

Output File: `output/{ticker}/{ticker}_balancesheet_durability.md`

Final Analysis Task

Description:

You are analysing the {company} as specified by the user.

Read the following files in the output/{ticker} folder which contain all necessary information:

- `output/{ticker}/{ticker}_balancesheet_durability.md`
- `output/{ticker}/{ticker}_earning_quality.md`

- `output/{ticker}/{ticker}_ownership.md`
- `output/{ticker}/{ticker}_valuation.md`

Goal:

Highlight mispricing signals (valuation, sentiment, catalysts) or any other information you deem important.
Red flags and required further work.

This is not a full investment memo.

- **Never** make up any data or add any information into the report that is not in the files provided
- Do not make anything up or fabricate any data
- Do not create any additional files, or output files, if there is information you deem important to output, place this in the output file specified
- Do NOT browse the web or make external calls - use only the provided files

Expected Output:

- A 1-2 page report describing the reasons you came to a decision about the company, given the information presented in the `initial_screening.md` document
- Describe how you arrived at your decision in line with the given metrics
- You must always provide a conclusion to your analysis
- You MUST sign off with your full name and role at the end
- Do not sign for other agents, only your own output
- Do **NOT** provide a recommendation, or any substance on what to do next
- Any additional information or documents required if anything is missing
